

When traveling, either from my home in Dansville to Florida for vacation or just down to the store to go shopping, my XM is always on. I do not have to subject myself to outrageous music and lyrics that local stations plays. I am not able to receive a variety of stations due to the area I live in and XM plays exactly what I want to hear. When traveling, tuning in a good station was also nearly impossible and I would be listening to cds and not regular radio anyway. I pay for the service and get the service I want. The variety that XM offers is fantastic and they should be able to offer their customers whatever they possibly can. TV used to be free, and now the cable and satellite companies are charging for their services - why - because they can offer the customer better reception and a variety of channels and the public is taking them up on their offer. XM is the best way to listen to music, news, sports, weather and traffic. Please, kindly reject petition 04! -160.
